MarCal | Micromar | MarCator

Hand-held measuring devices with integrated wireless system

Mahr's Integrated Wireless range guarantees you precise measuring results with full mobility. The modern and easy way to measure – without the restrictions of wired technology.

Maximum flexibility for every measuring task

Whether length, width, inner diameter or depth measurements – with Integrated Wireless measuring instruments you're perfectly equipped for every task. The wireless design gives you flexibility and freedom of movement in your measurements – whatever the manufacturing or production environment. The Integrated Wireless connection, together with your MarConnect interface, offers the optimal connection to your recording and evaluation program. It doesn't matter whether you choose to work with Windows Excel or a complex CAQ/SPC software.

- No data loss: Warning of connection issues
- Reference system for avoiding measurement errors
- Intuitive operation and easy handling
- Can be used individually in every production environment
- Easy integration in both Windows Excel and CAQ systems

Best results in every step

Mahr's portfolio of wireless devices offers you maximum mobility for your measuring tasks. The wireless solution of Integrated Wireless measuring instruments means you can measure without impediment – whatever you use your measuring device for. Mahr measuring instruments are your perfect companion in every manufacturing environment, reliably delivering the performance you have come to expect from state-of-the-art hand-held measuring devices.

Inexpensive

Use your wireless connection for the price of a cable. Purchasing a USB receiver stick (i-Stick) for your computer allows you to operate up to eight measuring devices simultaneously and saves you the additional cost of a connecting cable.

Uncluttered

Keep track! The absence of various cables allows you to keep your workplace tidy and free from clutter.

ID transmission

For quick assignment: The serial and order number are read out by the measuring instrument and saved in the measuring record.

Reliable

The wireless measuring devices with an integrated transmitter provide visual feedback that data is being transferred correctly, as well as an error message if the connection is lost.

Maximum mobility

Measure autonomously and without limits. Thanks to their wireless, compact system Mahr measuring instruments allow precise measuring – even in the machine or on difficult to reach workpieces.

6 meter range

8 measuring instruments simultaneously per i-Stick receiver

81 device versions for every measuring task

Integrated transmitter

Eliminate risks such as cable breaks or wear and tear. These types of hazard are now a thing of the past with integrated wireless technology.

Free software

Enjoy the benefits of MarCom Professional 5.3 interface software and transfer measuring data individually and conveniently to your Windows applications or CAQ software.

It couldn't be easier!

Scan the QR code and see how Integrated Wireless hand-held measuring instruments are used in practice.

Your interface for **even greater performance**

Two steps to the goal: combine your Integrated Wireless instruments with our multifunctional MarCom Professional software. This versatile interface tool combines data acquisition and data transfer with your data processing. How you process the collected data is entirely up to you – for maximum flexibility, choose from a range of output formats the one you find easiest to use.

Enjoy maximum individuality at the workplace with a free choice of output medium and four output formats:

- Virtual interface box: CAQ/SPC software
- Intelligent Excel interface: Microsoft Excel
- Emulation keyboard: any Windows software
- Text file: flexible data processing

The MarCal 18 EWRi workshop calipers with integrated wireless.

MarCom Professional is IATF ready and features a comprehensive range of functions for data transfer and data processing.

The Micromar 40 EWRi micrometer with Integrated Wireless.

Powerful and user-friendly thanks to continual updates!

Perfectly coordinated: MarCom Professional is the ideal data transfer software for all your quality assurance and production needs and is perfectly equipped for data acquisition using measuring equipment from the Integrated Wireless product line. A number of additional functions offer users maximum convenience when acquiring and transferring measurements.

3x

faster configuration

Save time: conveniently configure your measuring instruments via PC interface and eliminate the need for manually setting the instrument..

99%

more reliable

Avoid operating errors: all information is automatically transferred and assigned thanks to the automatic identification of measurements and serial number transfers.

Improved functions:

- Additional data: additional values are transferred to supplementary columns (name, serial number, item number, date and time)
- Device parameters can now be preset: reference values (preset, tolerance limits, warning limits in %) as well as function locks can be queried and changed on the instrument
- Improved Excel functionality:
 - Easily undo the last data transfer – right in the program with a simple click
 - Adapted column and row names: R1C1 reference style for use with Excel as in practice

New features:

- IATF ready: transfers and displays the measuring equipment ID and item and serial number to clearly allocate the measuring equipment to the measurements
- Tab settings in up to 3 areas: settings, device parameters and goal
- Scalable measurement value display
- Manually sort the device overview using drag-and-drop

MarCom Professional | Software

Reliable data transfer with MarCom Professional

Your measuring results are valuable: MarCom Professional, our free interface software, reliably and professionally transfers your measurements to your Windows applications or CAQ software.

The software is compatible with all electronic Mahr measuring instruments that use the MarConnect flexible interface concept. This includes the following connections:

- Integrated Wireless (wireless data transfer)
- USB
- Opto RS 232 or Digimatic
- External wireless modules

Integrated for improved performance

The portfolio of wireless devices with their integrated transmitter and perfectly coordinated software offers everything you need for the ideal measuring process. Mahr measuring technology is your perfect companion in every manufacturing environment, reliably delivering exactly the performance you have come to expect from state-of-the-art hand-held measuring instruments.

More **reliability**

Thanks to Mahr Integrated Wireless technology, you can rely on a tested and stable connection for transferring your measuring values.

The integrated connectivity display will alert you to any connection errors immediately – thus preventing the loss of valuable data.

Maximum **flexibility**

The simple application and compact, wireless design enables easy, precise measuring. It means that even in the tightest of spaces or with difficult to reach workpieces in awkward corners and angles, you will always have the upper hand in all measuring tasks.

Maximum **compatibility**

Excellent connectivity in every working environment: Effortlessly operate multiple wireless measuring instruments at the same time. Even workstations in close proximity are not a problem; incoming data streams are quickly and reliably assigned to the respective measuring instrument thanks to ID transmission. This flexible system allows you to import the measuring data to Excel or CAQ software as required and thereby tailor your measuring routine completely to your needs.

The latest generation of **calipers**

Integrated Wireless

Large display

The high-contrast display with 11 mm digits provides reliable, effortless measurement readings – even at the first glance.

Ergonomic design

The handy thumb rest guarantees easy handling and prevents slipping even in dirty environments.

Guide quality

Lapped slideways provide the unique quality of even and sensitive gliding of the slide. In addition, the service life is longer than that of ground guides due to a much greater percentage contact area of the slideway.

MarCal 16 EWri

Digital caliper

Functions

- ON/OFF
- AUTO-ON / OFF
- HOLD (storage of measured values)
- RESET (set display to zero)
- PRESET (for entering a numerical value)
- Reversal of counting direction
- mm/inch
- LOCK function (key lock)
- DATA (data transmission)

Features

- High-contrast analog display
- Locking screw above
- Lapped guideway
- Measuring blade for inside measurements
- Slide and beam made of hardened stainless steel
- Step measuring function
- Immediate measurements due to the Reference System
- Raised guideway for the protection of the scale
- Excellent resistance against dust, coolants and lubricants
- Dirt wipers are integrated in the slide
- Software: MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- Digit height: 11 mm
- Data interface: Integrated wireless
- Energy supply: Battery life approx. 3 years (approx. 0.5 in wireless mode)
- IP protection category: IP 67
- Package contains: battery, instruction manual, case

functions

- ON/OFF
- AUTO ON / OFF
- HOLD (storage of measured values)
- RESET (set display to zero)
- PRESET (enter a numerical value)
- Reversal of counting direction
- mm/inch
- LOCK function (key lock)
- DATA (data transfer)

Features

- Can be customized to the measuring task thanks to modular accessories (optional)
- Digital display can always be read as the measuring elements can be installed on the top or bottom
- The application range can be extended by turning the measuring arms
- The two arm holders can be moved along the rail for optimal balance, which is particularly practical with small dimensions
- Slide and rail are made of hardened stainless steel
- Data interface: Integrated wireless
- Power supply: Battery life approx. 3 years (approx. 0.5 in wireless mode)
- IP protection rating: IP 65
- Software: MarCom Professional is free to download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS-232 interface)
- Scope of delivery: Operating instructions, mounting and resting blocks, wooden box, without measuring arms/ mounting attachments and measuring anvils

Application:

for measuring inner and outer diameters, centering shoulders, narrow collars, outer and inner tapers, dovetails, recesses, bore distances

MarCal 16 EWri-S

MarCal 16 EWri-SA

MarCal 16 EWri-SI

MarCal 16 EWri-SM

MarCal 16 EWri-VS

Functions

- ON/OFF
- AUTO-ON / OFF
- HOLD (storage of measured values)
- RESET (set display to zero)
- PRESET (for entering a numerical value)
- Reversal of counting direction
- mm/inch
- LOCK function (key lock)
- DATA (data transmission)
- High-contrast analog display
- Locking screw on top
- Lapped guideway
- Measuring blade for inside measurements
- Slide and beam made of hardened stainless steel
- Step measuring function
- Immediate measurements due to the Reference System
- Raised guideway for the protection of the scale
- Excellent resistance against dust, coolants and lubricants
- Dirt wipers are integrated in the slide
- Software: MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- Height of digits: 11 mm
- Data interface: Integrated wireless
- Energy supply: Battery life approx. 3 years (approx. 0.5 in wireless mode)
- IP protection category: IP 67
- Package contains: battery, instruction manual, case

The latest generation of **micrometers**

Tolerance function with warning limits

Micromar 40 EWri

Digital micrometer set

Functions

- RESET (set display to zero)
- ABS (display can be set to zero without losing reference to ORIGIN)
- mm/inch
- ORIGIN (for entering a numerical value)
- LOCK function (key lock)
- TOL (Tolerance and warning limits)
- HOLD (storage of measured values)
- DATA (data transmission)
- Bi-directional data interface (external input option of characteristic values and setting of individual lock functions by software MarCom)

Features

- High-contrast analog display
- Stainless spindle is hardened throughout and ground
- Spindle and anvil are carbide tipped
- Rapid drive
- Ratchet is integrated in the thimble
- Lacquered steel frame, heat insulated
- MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- Digit height: 10 mm
- Data interface: Integrated wireless
- Energy supply: Battery life approx. 3 years (approx. 0.5 in wireless mode)
- IP protection category: IP 65
- Package contains: instruction manual, battery, setting values, case

Micromar 40 EWri-L

Digital micrometer

Functions

- RESET (set display to zero)
- ABS (display can be set to zero without losing reference to ORIGIN)
- mm/inch
- ORIGIN (for entering a numerical value)
- LOCK function (key lock)
- TOL (Tolerance and warning limits)
- HOLD (storage of measured values)
- DATA (data transmission via connection cable)
- Bi-directional data interface (external input option of characteristic values and setting of individual lock functions by software MarCom)

Features

- High-contrast analog display
- Stainless spindle is hardened throughout
- Spindle and anvil are carbide tipped
- QUICK DRIVE
- Rapid adjustment
- Sliding spindle
- Ratchet is integrated in the thimble
- Lacquered steel frame, heat insulated
- Software: MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- Digit height: 10 mm
- Data interface: Integrated wireless
- Energy supply: Battery life approx. 2 years (approx. 0.5 in wireless mode)
- IP protection category: IP 65
- Package contains: instruction manual, battery, setting standard (measuring range of 25-50 mm), case

Application:

- Avoiding workpiece damage: The non-rotating spindle has a infringing touch, which prevents scratch marks on sensitive and finely machined surfaces
- Ideal for measuring thin metal foils without twisting and bending them
- Thread flank measurement by using thread wires: Both wire holders always remain in the engaged position with the non-rotating spindle

- Bi-directional data interface (external input option of characteristic values and setting of individual lock functions by software MarCom)

- Package contains:
For each pair of measuring anvils:

- 40 Ef flat Ø 6.5 mm
- 40 Ea offset Ø 2 x 4 mm
- 40 Et plate Ø 11.3 mm
- 40 Eb spherical R= 5 mm
- 40 Ep tapered 60° Ø 0.3 – 5.5 mm
- 40 Es blade 0.75 x 4 mm

- instruction manual, battery, case

Application:

Universal adjustment to different workpieces and measurement situations using individual interchangeable measuring anvils. Thread flanks and spherical measuring anvils (optional accessories) can also be used.

Micromar Thread anvils

Digital micrometer

Features

- Wear-resistant special steel, hardened. With cylindrical mounting shank and retainer ring for rotatable mounting in the bore of the measuring spindle and anvil.
- Pair comprises V-anvil and cone.
- With a pitch of 0.2 - 0.45 mm, the V-anvil bridges 3 turns. It should therefore be set with 715 E thread adjustment pins, otherwise with 43 Z setting standards.

The latest generation of dial indicators

Clear tolerance display

The practical tolerance function makes tolerance deviations easy to detect thanks to clear symbols. Values that are below or above the permitted tolerance range are indicated by arrows in the display.

Save time with reference system

After it has been set once, the zero position will be saved for all subsequent measurements, even after automatic switch-off in energy saving mode. Thanks to the reference system, your measuring instrument will always be ready to measure.

Absolute function

The dial indicator can be set to zero in any position without losing its absolute reference.

Marameter 840 F with
MarCator 1086 Ri

MarConnect i-Stick

The compact i-Stick allows you to connect your wireless instruments to your work computer. Plug the receiver into a USB port and use up to eight measuring instruments at the same time. The MarCom Professional 5.3 free software is the ideal interface for your applications.

MarCator 1086 Ri

Digital indicator

Functions

- ON/OFF
- RESET (set display to zero)
- mm/inch
- Reversal of counting direction
- PRESET (for entering a numerical value)
- TOL (enter tolerance limit values)
- <0> (tolerance GO / NO GO display mode)
- ABS (display can be set to zero without losing reference to preset)
- DATA (data transmission via connection cable)
- Factor (adjustable)
- LOCK (individual key lock)

Features

- Integrated wireless transmitter
- High-contrast LCD
- Operating and display unit (bezel) can be rotated through 280°
- Mounting shank and measuring spindle are both made of hardened stainless steel
- Immediate measurements due to the Reference System
- Software: MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- Digit height: 11 mm
- Data interface: Digimatic, Opto RS232C, USB, Integrated wireless
- IP protection category: IP 42
- Package contains: instruction manual, battery

REF
system

Application:

Comprehensive measuring function for static measurements such as lengths, distances and length differences

4884464	Battery 3 V, CR 2032	

MarCator 1086 WRi

Digital micrometer

Functions

- ON/OFF
- RESET (set display to zero)
- mm/inch
- Reversal of counting direction
- PRESET (for entering a numerical value)
- TOL (enter tolerance limit values)
- <0> (tolerance GO / NO GO display mode)
- ABS (display can be set to zero without losing reference to preset)
- DATA (data transmission via connection cable)
- Factor (adjustable)
- LOCK (individual key lock)

REF
system

Application:

Comprehensive measuring function for static measurements such as lengths, distances and length differences

Features

- Integrated wireless transmitter
- High-contrast LCD
- Operating and display unit (bezel) can be rotated through 280°
- Mounting shank and measuring spindle are both made of hardened stainless steel
- Immediate measurements due to the Reference System
- Software: MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- Digit height: 11 mm
- Data interface: Digimatic, Opto RS232C, USB, Integrated wireless
- IP protection category: IP 54
- Package contains: instruction manual, battery

Accessories

Order No.	Product name	Type
4102220	Receiver for instruments with integrated wireless	i-Stick
4102357	Data connection cable USB (2 m)	16 EXu
4102915	Digimatic data cable (2 m)	16 EWd
4102410	Data connection cable RS232C (2 m)	16 EXr
4375004	Protective cap for 1075 R / 1086 R / 1087 R	1086 s
4337421	Lug back	1086 b
4336311	Cable release (12,5 + 25 mm)	1085 a
4310103	Adapter bush (.375" / 8 mm)	940
4336237	Pneumatic lifting (12,5 + 25 mm)	1082 p
4337472-E	Rubber bellows (12,5 mm)	
4884464	Battery 3 V, Type CR 2450	
4337474-E	Rubber bellows (25 mm)	

Functions

- 0 (set the analog display to zero)
- ABS (display can be set to zero without losing reference to preset)
- AUTO-ON / OFF
- DATA (data transmission via connection cable)
- Factor (adjustable)
- LOCK (individual key lock)
- MAX/MIN memory for searching the reversal point
- ON/OFF
- PRESET (for entering a numerical value)
- RANGE (switch the measuring range and resolution)
- RESET (set display to zero)
- TIR (MAX-MIN) for testing flatness and concentricity
- TOL (enter tolerance limit values)
- Reversal of counting direction
- mm/inch

Features

- Integrated wireless transmitter
- High-contrast LCD display
- Operating and display unit (bezel) can be rotated through 280°
- Lifter protection cap on the measuring spindle
- Clamping shaft and measuring pin made of hardened stainless steel
- Immediate measurements due to the Reference System
- Software: MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- Digit height: 8,5 mm
- Data interface: Digimatic, Opto RS232C, USB, Integrated wireless
- Energy supply: Battery operation
- IP protection category: IP 42
- Package contains: instruction manual, battery

Application:

Comprehensive measuring functions for:

- Static measurements such as lengths, distances and length differences
- Dynamic measurements such as radial runout, straightness and flatness via MAX / MIN / MAX-MIN functions

MarCator 1087 BRi

Digital Indicator

Functions

- ON/OFF
- RESET (set display to zero)
- mm/inch
- PRESET (enter a numerical value) from range 500 mm
- Reversal of counting direction
- TOL (enter tolerance limit values)
- START/STOP search for reversal point
- MAX/MIN memory for searching the reversal point
- ABS (display can be set to zero without losing reference to preset)
- 0 (set the analog display to zero)
- DATA (data transmission via connection cable)
- Factor (adjustable)
- LOCK (individual key lock)

Features

- Integrated wireless transmitter
- High-contrast LCD display
- Operating and display unit (bezel) can be rotated through 280°
- Lifter protection cap on the measuring spindle
- Clamping shaft and measuring pin made of hardened stainless steel
- Immediate measurements due to the Reference System
- Software: MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- Digit height: 8,5 mm
- Data interface: Opto RS232C, Digimatic, USB, Integrated wireless
- Energy supply: Battery life approx. 3 years
- IP protection category: IP 42
- Package contains: instruction manual, battery

Application:

In measurements with a 2-point bore gage the reversing point can be calculated automatically during oscillation. Then a PRESET value can be assigned. The ACTUAL value measured is saved by the MIN or MAX function and is shown on the display. The 1087 BRi model can process 64 measured values per second, for fast measuring movements combined with measuring certainty.
