TRUE VALUES

Within the CHIRON Group, CMS is the specialist for retrofit machines from CHIRON, STAMA and SCHERER.

These world-leading brands have made solid, long-lasting mechanical engineering their priority, with machines that continuously perform as long-term profit centers for industry leaders worldwide. This reliability and long-lasting precision also define **the preconditions for a worthwhile "Retrofit."**

With a retrofit from CMS, you get the finest in machine construction. Equipped and geared up to face new challenges. At a price which makes it more than appealing to enter the premium-class.

Benefits of a CMS retrofit:

- CMS knows innately the history, the quality and the workings of each offered machine
- CMS has the infrastructure and personnel resources for checking and overhauling of second-hand machines to meet customer-specific requirements
- CMS offers accuracy, fully-consistent with a new machining center
- CMS also has direct access to original parts, drawings and documentation
- CMS offers short delivery times

CMS RETROFIT

With passion for perfection

Wur passion is the restoration of state-of-the-art machines. We trust CHIRON, STAMA and SCHERER original parts; therefore you can be sure that the profitability and lifetime of your machining center will exceed expectations. Additionally, any machine with available equipment options can be adapted to customer requirements.

Partly refurbished machining center

New:

All the parts required for function & reliability are replaced

Quality features:

50 hours continuous duty, Quick – Check, NAS part, Geometry protocol

3 months warranty

» Meets the high criteria of the CHIRON Group

Function tested machining center

New:

Defective parts which are necessary for the machine operation, are replaced

Quality features:

8 hours continuous duty, NAS part, Geometry protocol

» Full functionality

Completely refurbished machining center

New:

All the components which are important for function & precision are **NEW**

Quality features:

100 hours continuous duty, Quick-Check, NAS part, Geometry protocol

Tolerance:

Accuracy as-new machines

6 months warranty

» AS NEW

ADDED VALUE

... thanks to greater performance – modernization & refurbishment

Refurbishment: CMS fully restores your old machining center, quickly and at low cost. Professionally executed retrofitting increases reliability, prolongs longevity and maintains the resale value of your machines. Should you no longer require a machine, CMS would be glad to make you a fair offer to rebuy it.

RAPID PROTOTYPING

The most efficient way to materialize your ideas

Production cycles are becoming increasingly shorter, and so is the span between concept and development.

- Production of sample parts, along with initial sampling inspection including statistics and evaluations
- Bridging downtimes in case of modernization, retrofitting and refurbishment
- Executing a customer order at short notice before the delivery date of a new CHIRON, STAMA or SCHERER machining center

Financing:

- Rent
- Hire purchase
- Purchase
- Leasing*

* Attractive financing offers possible through our leasing partners. Ask us!

CMS TURNKEY

From planning to small series production

- Process design & engineering
- Experienced project management
- Validation of statistical process capability
- Ensuring targeted productivity
- Production assistance during the initial phase
- Automation solutions
- Operation and programming training
- CHIRON Group Service available around the world

SERVICE

Fast, global and reliable

CMS customers can take advantage of the same services of the CHIRON Group.

Only you will know that your machines
have gotten a second life
